

NUK Nature Sense

BREAST MILK IS BEST FOR BABY. Product information intended for internal use only.

Nature Sense Teat

Several tiny openings

as in a mother's nipple for a smooth flow.

Advanced one piece Air vent

Baby can drink from the breast without having to pause which helps prevent air being swallowed.

Extra-soft zone

Soft and flexible to adapt to the shape of baby's mouth.
Spill proof design.

Flexible teat

moves with baby for a continuous latch.

Wide lip rest

lets babies latch on well.

Scientifically proven

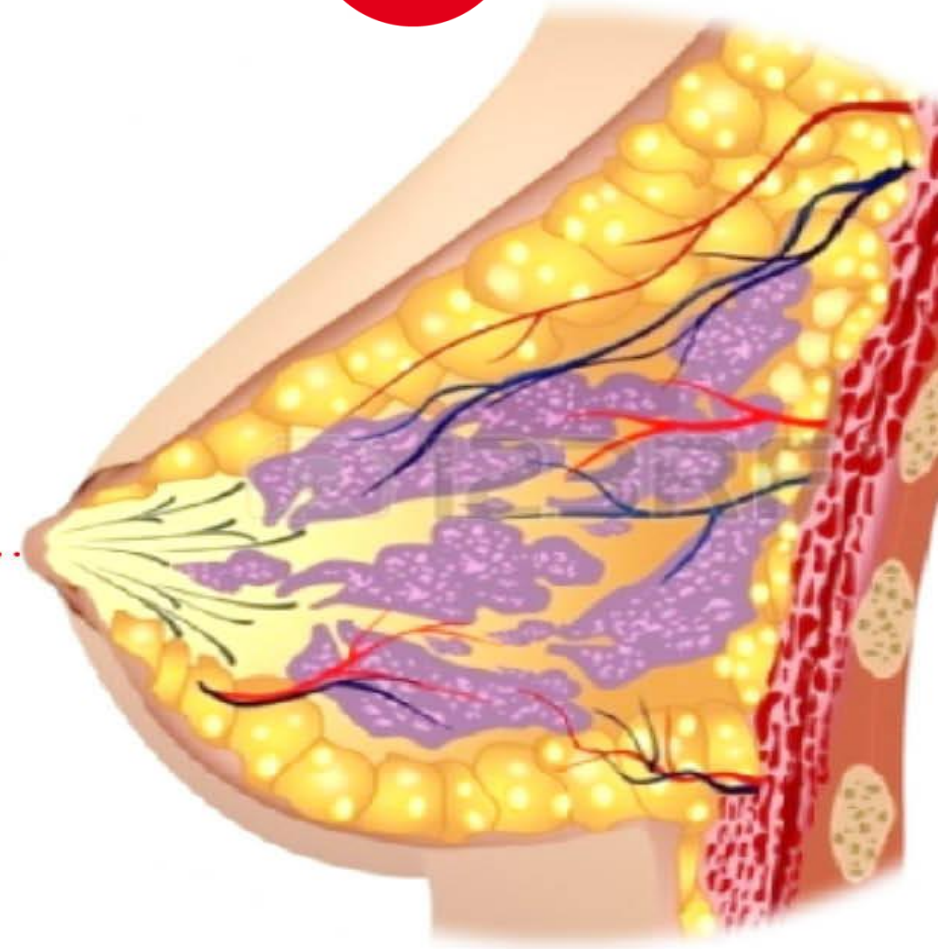

*The Nature Sense feed hole concept
is based on medical research:*

*Every nipple has an **average 3.90 milk duct orifices****

*The **mean number of milk ductal orifices** determined in
95 women when both nipples were observed was **7.6****

*This insight has helped determine the optimal number
of feed holes for the new NUK Nature Sense Teats*

Feel the Flow...

3

6

9

Small

for thin liquids such
as breast milk,
water

Medium

for milk (formula)

Large

for thicker feeds
